## Program Description

This program is designed for surgeons to gain experience with circular framing through expert-guided, hands-on training and didactic presentations. Attendees will learn the latest Smith+Nephew circular fixation technologies, indications, and applications utilizing TAYLOR SPATIAL FRAME<sup>®</sup> and SMART TSF<sup>®</sup>.

## Learning Objectives

Upon completing this course, participants will be able to:

- Identify indications and practical guidelines around the safe and effective use of the TAYLOR SPATIAL FRAME and SMART TSF
- Gain knowledge of proper biomechanics for circular fixation and stable frame applications
- Understand the complexity of limb deformities and experience case programming methods in SMART TSF software, including the new Super Dot and Trauma Dots deformity analysis modes

## Participant Profile

Current US orthopaedic surgeons trained in traumatology, foot and ankle, limb deformity and correction, or pediatrics.
